
1 (TWICE AMENDED). A fabricating method for a liquid crystal display panel comprising:

- providing first and second substrates;
- forming first and second orientation films on the first and second substrates, respectively;
- depositing a liquid crystal material on the first orientation film of the substrate, wherein the deposited liquid crystal material has a viscosity greater than about 20 to 50 mm²/sec;
- forming a seal material at edges of the first substrate after depositing the liquid crystal material; and
- attaching the first and second substrates.

REMARKS

At the outset, the Examiner is thanked for the thorough review and consideration of the subject application. The Non-Final Office Action of December 26, 2002 has been received and contents carefully reviewed.

By this amendment, Applicants amends the Title and claim 1. Accordingly, claims 1-20 remain pending within the instant application.

In the Office Action, the Examiner objected to the title of the invention as not being descriptive; rejected claims 1, 3-7, 12, 14, and 15 under 35 U.S.C. § 102(b) as being anticipated by or, in the alternative, under 35 U.S.C. § 103(a) as obvious over Harada et al. (U.S. Pat. No. 5,361,152); rejected claims 10, 11, 18, and 19 under 35 U.S.C. § 103(a) as being unpatentable over Harada et al. in view of Kim et al. (U.S. Pat. No. 5,742,370); rejected
